Vacancy Management

- VACANCY\_CREATED
- VACANCY\_UPDATED
- VACANCY\_CLOSED

Application Management

- APPLICATION\_SUBMITTED
- APPLICATION\_APPROVED
- APPLICATION\_REJECTED

The diagram illustrates a comprehensive database schema for an educational platform. It features a central 'users' table with attributes like 'id', 'user\_slug', 'email', 'password', 'address', 'dp', 'contact', 'banner', 'is\_disabled', 'created\_date', and 'last\_modified\_date'. This table is linked to various other tables, including 'roles', 'content', 'comments', 'posts', 'messages', 'conversations', 'user\_follow', 'user\_activity', 'audit\_log', 'student', 'institute', 'teacher', 'application', 'announcement', 'module', 'course', 'batch', 'payment', 'student\_batch\_enrollment', 'student\_assignment\_submit', 'assignment', 'grading\_range', 'resource', 'lecture\_recording', 'scheduled\_lecture', 'review', and 'feedbacks'. The relationships are defined by lines connecting the tables, with cardinalities (1, N, U) indicating the nature of the associations. For example, a user can have many roles (1 to N), a user can follow many other users (1 to N), and a user can create many posts (1 to N). The 'users' table also has a 'roleid' foreign key to the 'roles' table. The 'roles' table has attributes 'id', 'role', 'created\_date', and 'last\_modified\_date'. The 'content' table has attributes 'id', 'content\_type', 'status', 'visibility', 'created\_by', 'created\_date', and 'last\_modified\_date'. The 'comments' table has attributes 'id', 'postid', 'message', 'commented\_on', 'last\_modified\_at', and 'userid'. The 'posts' table has attributes 'userid', 'id', 'description', 'content', 'post\_type', 'posted\_on', 'last\_modified\_date', and 'contentid'. The 'messages' table has attributes 'id', 'content', 'sent\_at', 'is\_read', 'sender\_id', 'receiver\_id', and 'conversationid'. The 'conversations' table has attributes 'user1\_id', 'user2\_id', 'id', 'last\_message\_at', and 'timestamp'. The 'user\_follow' table has attributes 'following\_id', 'follower\_id', 'followed\_on', 'created\_date', 'last\_modified\_date', and 'timestamp'. The 'user\_activity' table has attributes 'userid', 'id', 'activity\_type', 'entity\_type', 'entity\_id', 'description', 'ip\_address', 'user\_agent', and 'created\_date'. The 'audit\_log' table has attributes 'id', 'userid', 'activity\_type', 'entity\_type', 'entity\_id', 'old\_value', 'new\_value', 'ip\_address', 'user\_agent', and 'created\_date'. The 'student' table has attributes 'id', 'first\_name', 'last\_name', 'date', 'user\_id', and 'timestamp'. The 'institute' table has attributes 'id', 'institute\_name', 'user\_id', and 'timestamp'. The 'teacher' table has attributes 'id', 'first\_name', 'last\_name', 'date', 'user\_id', and 'timestamp'. The 'application' table has attributes 'id', 'teacher\_vacancyid', 'teacherid', 'status', 'applied\_date', and 'last\_modified\_date'. The 'announcement' table has attributes 'id', 'instituteid', 'courseid', 'batchid', 'title', 'description', 'visibility', 'status', 'is\_pinned', 'published\_date', 'expire\_at', 'created\_date', and 'last\_modified\_date'. The 'module' table has attributes 'id', 'teacherid', 'batchid', 'name', 'status', 'created\_date', and 'last\_modified\_date'. The 'course' table has attributes 'id', 'instituteid', 'title', 'description', 'thumbnail', 'price', 'duration\_in\_hours', 'category', 'language', 'level', 'mode', 'status', 'avg\_rating', 'total\_no\_ratings', 'created\_date', and 'last\_modified\_date'. The 'batch' table has attributes 'id', 'courseid', 'name', 'is\_seat\_limited', 'max\_seat\_limited', 'start\_date', 'time', 'batch\_status', 'enrollment\_status', 'created\_date', and 'last\_modified\_date'. The 'payment' table has attributes 'id', 'studentid', 'courseid', 'instituteid', 'amount', 'payment\_status', 'payment\_method', 'transaction\_ref', 'created\_date', and 'last\_modified\_date'. The 'student\_batch\_enrollment' table has attributes 'id', 'studentid', 'courseid', 'batchid', 'paymentid', 'status', 'created\_date', and 'last\_modified\_date'. The 'student\_assignment\_submit' table has attributes 'id', 'studentid', 'assignmentid', 'url', 'type', 'status', 'grade', 'marks\_gained', 'submitted\_at', 'last\_modified\_date', and 'attempt\_no'. The 'assignment' table has attributes 'id', 'topic', 'description', 'url', 'total\_marks', 'assignment\_available\_on', 'assignment\_due\_date', 'late\_submit', 'allow\_resubmission', 'created\_date', 'last\_modified\_date', and 'max\_attempts'. The 'grading\_range' table has attributes 'id', 'assignmentid', 'min\_marks', 'max\_marks', 'desired\_grade', and 'description'. The 'resource' table has attributes 'id', 'chapterid', 'name', 'type', 'url', 'created\_date', and 'last\_modified\_date'. The 'lecture\_recording' table has attributes 'id', 'chapterid', 'recorded\_date', 'title', 'url', 'created\_date', and 'last\_modified\_date'. The 'scheduled\_lecture' table has attributes 'id', 'chapterid', 'topic', 'start\_date', 'start\_time', 'end\_time', 'end\_time', 'status', 'late\_attendance', 'created\_date', and 'last\_modified\_date'. The 'review' table has attributes 'id', 'courseid', 'userid', 'review', 'rating', 'created\_date', and 'last\_modified\_date'. The 'feedbacks' table has attributes 'id', 'courseid', 'userid', 'feedback', 'created\_date', and 'last\_modified\_date'.
